**Abstract**

**Basic Abstract**

FR2571230 A The device is for forming shaving foam and has a container (1) which holds the liquid soap. The container has a threaded neck (12) on which a cylindrical body (22), carrying a shaving brush (21) is screwed. The body has holes (23) through it which communicate with an opening (11) through the neck.

A seal (3) fits between the body and the opening of the container, to prevent leakage. A cover (4) fits over the shaving brush to protect it. The brush can also be used for treating the hair so washing the face.

ADVANTAGE - Various bodies and brushes can be fitted on a single container. (11pp Dwg No. 1/5)
